PROOF OF LABOR

The undersigned hereby certifies that at least \$ 3100 is the value of improvements completed and now being completed through geologic studies and analysis for the making of this proof.

The character of such expenditures for the assessment work year ending at noon September 1, 1971, being exploration drilling and related expenditures performed by Humble Oil and Refining Company under an agreement which consolidated this group of claims with contiguous claims immediately north of the Mountain Lion group and said drilling has supplied valuable information tending to develop said group of claims. Information now available, including cores from the adjacent exploration drilling, now undergoes geologic appraisal as it relates to further exploration in the area. Studies show that said exploration drilling will materially assist in the further exploration and development of the Mountain Lion group of claims which consist of the following 31 lode claims:

Mountain Lion, Mountain Lion 1 through 29

White Prince

Said claims are situated in Sections 16,17,18,19,20,21, 11N,R66E M.D.B.M. mostly embracing the south 1/2 of Sec.17 and probably falls between the Comet and Highland Mining Districts.

All of said claims are contiguous and form one compact group as well as being contiguous and forming a compact group with the claims immediately to the north on which the above-mentioned exploration drilling was performed. Drilling was performed after September 1, 1970, reports on the drilling were received in Feb. 1971 cores were later shipped from Reno to Caselton, Nevada and are now undergoing studies and evaluation by the undersigned, thereby completing assessment work performance for 1971.
