1 This sub-paragraph may be used where the claim is on public surveyed land. Section No. of the Public Resources Code provides, in part, as follows: "Where the United States has been extended over the land embraced in the location, however, the claim may be taken by legal subdivisions and no other reference than those of such survey shall be required, and the boundaries of a claim so located and described need not be staked or monumented. The description by legal subdivisions shall be deemed the equivalent of marking." This section does not specify an exact way of marking a placer claim as is done for quartz claims. When possible, placer claims should be located by legal subdivisions, as the land office will in practically every case require such conformity with public survey lines before issuing patent. Expense and delay will be saved by locating in this way. Prudence will dictate care, however, in taking advantage of this portion of Section No. to the exclusion of actual marking of boundaries as there is often great difficulty in actually finding and proving the identity of old section corners and quarter section corners. Where possible, therefore, it may be advisable to use BOTH the legal subdivision method and the method of actual marking of boundaries.

2 Use this sub-paragraph either where the claim is on public or unsurveyed land or, where prudence dictates, if land is surveyed. As stated above, where possible, it may be advisable to use BOTH the legal subdivision method and the method of actual marking of boundaries.

3 Witnesses are optional and not required.

4 Public Resources Code - Section 2313 reads, in part, as follows: "Within 90 days after the posting of his notice of location upon a placer claim the locator shall record a true copy of the notice together with a statement of the markings of the boundaries as required in this chapter, and of the performance of the required discovery work, in the office of the county recorder of the county in which such claim is situated. The county recorder shall receive a fee of one dollar (1) for this service."
