Situated in Township 32 South, Ranges 19 and 20 West, Salt Lake Meridian, Iron County, Utah.

3. That approximately two (2) months of field time were spent on such labor and improvements consisting of rock chip and placer geochemical survey, road rehabilitation and drill pad preparation, the value of which aggregates at least \$13,700.00 or \$100.00 per claim.

4. That the program began on June 15, 1981 and ended on August 31, 1981.

5. That such labor was performed and improvements were made by contractors and employees of AMAX Exploration, Inc., all under the supervision of the affiant, and at the instance and request of AMAX Exploration, Inc., owner of said claims. Attached to the Affidavit is a copy of the report of such work as required by Title 30, United States Code, Section 28-1.

6. That the bulldozer work was performed by AAA Welding, Inc. of Milford, Utah, 84751.

7. That the above named claims form a part of a contiguous group and such work and improvements were done and made for the benefit of each and all of said claims as a group under a common plan of development.

8. That the notices were posted as required by Section 40-1-5, Utah Code Annotated (1953) for these claims in Utah.

SUMMARY REPORT
September 5, 1981

This detailed report is filed in compliance with the requirements of Title 30, United States Code, Section 28-1 for the S.L. Nos. 35-117, 119-132, 184, a contiguous group of 98 lode mining claims situated in the Stateline Mining District of Iron County, Utah.

The work consisted of detailed heavy concentrate and rock-chip sampling in the Utah claim group to evaluate the discovery of valuable mineral deposits located thereon and to assist in planning further exploration and development work.

The work was performed in the periods:

10 June 1981 to 8 August 1981

under the direct supervision of John D. Wood of 12620 W. Cedar Drive, Lakewood, CO 80228, a geologist of 8 years experience in mineral exploration with a BS and MS degree in geology from Portland State University, Portland, Oregon.

The cost of the survey exceeded \$4,000.00 and was paid for by AMAX Exploration, Inc., owners of the subject mining claims.

The basic findings of the detailed geochemical survey indicate the claim block is underlain by hydrothermally altered and quartz veined volcanics and possible intrusive rocks with chemical values that may be indicative of concealed economic mineralization.
