

**GEOLOGIC LEGEND:**

Additions on this claim map show where chip samples of surface outcrops were taken to confirm the quality of exposed outcrops over the 15,000 foot length of white limestone. CaO percentage in chip samples taken at well exposed locations from KLSS 3 (south end) to KLSS 6 (north end) indicate what is believed to suggest a continuous, at or near surface strata of high grade limestone.

MAP SHOWING LODGE CLAIMS LOCATED FOR SIERRA CHEMICAL COMPANY WITH ADDITIONS TO THE PREVIOUSLY ESTABLISHED "DORLA" GROUP. THIS ADDITION CONSISTS OF KLSS 1, 2, 3 TO SOUTH OF DORLA 10 AND KLSS 4, 5, 6 LOCATED TO NORTH OF DORLA 15 AS SHOWN.

Scale of map, 1" = 500'
