Summary Report of Geological, Geochemical and/or Geophysical Assessment Labor

This detailed report is filed in compliance with the requirements of Title 30, United States Code, Section 28-1 for the following contiguous group of 60 lode mining claims situated in the Viola Mining District of Lincoln County, State of Nevada:

Viola #4-11, inclusive      Viola #22-28, inclusive  
Viola #37                      Viola #38  
Viola #53-56, inclusive      Viola #61-63, inclusive  
Viola #72-83, inclusive      Viola #94  
Viola #111-133, inclusive

Field work in 1982 consisted of geologic mapping and geochemical sampling in the Viola claim group. Geochemical samples were analyzed for gold, silver, mercury and copper. The field work and subsequent office compilation required 40 man-days of labor from July, 1983 through August, 1983 and cost in excess of \$6,000, wholly at the expense of Denison Mines (U.S.) Incorporated. This geological/geochemical program was supervised by P. Edward Kavanagh, a geologist with 6 years of experience in exploration, with a degree from Dartmouth College (M.A., Geology, 1981), whose address is 2250 S. Josephine, Denver, Colorado 80210.

Results of this work indicate the possibility of a bulk-mineable gold-silver deposit in the Viola claim area. Favorable precious metal-bearing lithologies were identified in several areas of the claims.

All technical work and results are in the possession of and are considered to be the exclusive property of Denison Mines (U.S.) Incorporated, a Delaware corporation, the owner of the subject mining claims, with offices at Suite 814, 1776 Lincoln Street, Denver, Colorado 80203.
