TO AFFIDAVIT OF ANNUAL ASSESSMENT LABOR

Summary Report of Geological, Geochemical and/or Geophysical Assessment Labor

This detailed report is filed in compliance with the requirements of Title 30, United States Code, Section 28-1 for the following contiguous group of 53 lode mining claims situated in the Silverhorn Mining District of Lincoln County, State of Nevada:

COIN Claims #1-53, inclusive

Late 1982 compilation and evaluation of geochemical data and drill results and 1983 geochemical sampling were performed on the COIN claim group. Approximately 500 geochemical samples were collected, to be analyzed for gold and silver. The work required over 60 man-days of labor from September, 1982 through July, 1983 and cost in excess of \$5,300, wholly at the expense of Denison Mines (U.S.) Incorporated. This geochemical assessment and evaluation program was supervised by P. Edward Kavanagh, a geologist with 6 years of exploration experience, with a degree from Dartmouth College (M.A., Geology, 1981), whose address is 2250 S. Josephine, Denver, Colorado 80210.

Results of this work indicate the possibility of a bulk-mineable silver deposit in the COIN claim area. Trace element data, silver anomalies and favorable lithologies on the claim block are all supportive of sediment-hosted, Carlin-type mineralization.

All technical work and results are in the possession of and are considered to be the exclusive property of Denison Mines (U.S.) Incorporated, a Delaware corporation, the owner of the subject mining claims, with offices at Suite #814, 1776 Lincoln Street, Denver, Colorado 80203.
