

Lincoln County

September 12, 1989

SUMMARY REPORT

This report is filed in compliance with the requirements of Title 30, United States Code, Section 28-1, for the PERTALOTE No. 34-D NMC Number 385541, a mining claim situated in Section 34, T12S, R66E, in Lincoln County, Nevada.

The work consisted of geochemical sampling and analysis of the entire claim group, to evaluate the discovery of valuable mineral deposits located thereon and to assist in planning further exploration and development work. The work was performed between the dates of May 1 and August 1, 1989 by K. R. Petroleum, Inc. and Spectra-Chem Analytical Laboratory. The results were evaluated by Ramon S. Zabak, President of Spectra-Chem Analytical Laboratory, 9777 Harwin Drive, Suite 608, Houston, Texas 77036, a specialist in precious metal assay, with a degree of Bachelor of Science (Chemistry) from the University of Houston, 1982. The cost of the geochemical sampling and analysis exceeded \$100.

The study indicated that the property has potential for disseminated gold deposits similar to other known mineralized properties in the region.

Further studies of the claim group are under consideration. All technical work and results are in the possession of Robert D. Murphy, one of the owners of the subject mining claims.

Respectfully submitted,
