(18) Water from the source given and through the works described is also used for the following purposes other than irrigation: stockwater

(19) The character of the soil is sandy loam A continuous flow of 3.5 cubic feet of water per second has been used to irrigate 140.1 acres of land and 5 acre-feet per acre per annum have been used to irrigate the crops.

(20) Remarks: This Proof of Appropriation is to amend Certificate 01704, The map supporting 01704 showed all of the acres irrigated as of 1918 (except for the NW 1/4 section 2), but the Certificate, for some reason did not show it. This may be because of Cert. 01262 and its map, of which is in complete error. I am submitting affidavits from leading citizens of a few years back, and of whom are mostly now deceased who certify of the validity of the irrigated lands of this ranch. I am also submitting an amended map of a portion of the ranch which was discounted at the time because it was in Gov't ownership. I have now got a patent on that property under the unintentional trespass act. I am also showing a new place of diversion as a part of the amendment, because the flooding in Meadow Valley Wash has made the channel much deeper, necessitating these changes. I have deeds from the original owners prior to 1900 to the present time showing all transfers.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by James B. Tennille, Jr. are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant
