mapping, development of a mining plan for ore production from the Daily East vein, collection and haulage of ore samples from underground and surface exposures for assaying and extensive metallurgical test work performed by professional metallurgists and testing laboratories. An old portal opening at the Volcano mine was closed and plugged to prevent unauthorized entry for safety reasons.

The work described above was performed by LaVar Hollingshead, an experienced mining contractor; A. Cottino, engineer; N. Sims, engineer; R. Nelson, engineer; Dawson Metallurgical Laboratories; Knelson Gold Concentrators, Inc..

Affiant states that the above-described work and labor, comprising \$100 for each unpatented mining claim, is to be applied to the above-described unpatented mining claims to hold the same for the annual assessment period ending at Noon on September 1, 1992.

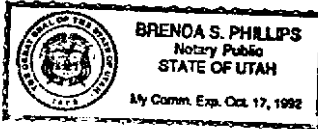

Dated at Salt Lake City this 18th day of August, 1992
