BASIS OF BEARING
The Basis of Bearing is a line between the NW corner and North 1/4 Corner of Sec. 4, T.2 S., R.68 E., M.D.M., which bears N. 89° 45' 16" E., as shown on James J. Owens Boundary Line Adjustment - Book 94, Page 616.

SURVEYOR'S NOTE
Fence line intersections at the center of a block are held as center of Block Corner. Distances measured between block corners are held, with the full width of the road remaining always constant; and the remaining lot distances to the road evenly distributed. These fence lines of occupation are the only evidence of the original monumentation of the Town of Panaca, as no street centerline intersections were ever monumented.
