NOTE

The location (discovery point) and corner monuments should be designated on the accompanying diagram to make the record of the claim more perfect.

A mining claim may not exceed 1500 feet in length along the vein or lode, by 600 feet in width, 300 feet on each side of center of vein on the surface.

No location of a mining claim can be made until the discovery of the vein or lode within the limits of the ground claimed.

The claim must be distinctly marked on the ground, so its boundaries can be easily traced.

A severe penalty is provided by law for removing or defacing the stakes or monuments of a mining claim.

Claims located on Sunday or holidays ARE legal.

All valuable mineral deposits in lands of the Government are located by citizens of the United States only, and those who have declared their intention to become such.

This location notice must be filed for Record with the County Recorder of the county in which the claim is located, and a duplicate notice left at the discovery monument.
