The findings of the above work are as follows:

The claims are located on a hot springs system which is mineralized with various metals, including gold, mercury and silver. Mercury is near the surface, but gold and silver should be present deeper down.

The work was performed under the direction of Chris W. Ralph whose qualifications to supervise such work include the following experience and education: Mr. Ralph has a degree in Mine Engineering from UNR's Mackay School of Mines. He has experience in precious metals exploration.

All of the aforesaid unpatented mining claims are contiguous and work on, or for the benefit of, any one claim or group of claims tends to develop all the claims. The work was performed for the purpose of developing the mineral potential of the claims and to maintain and hold such claims.
